

The development strategy

The gmina strategy drawn up by representatives of different social environments is a basic tool used to control the gmina development that combines with state, voivodship, powiat interests with the gmina's ones. The strategic aim is:

The dynamic and balanced development bringing the gmina to the European standards.

The aim will have been achieved by 2012 year by the realization of the following points:

- the environment condition consistent with the current regulations
- the safe gmina
- the modern social infrastructure
- the gmina promotion
- the attractive graduate and school leaver on the working market
- the favorable conditions to develop business activities
